INTRODUCTION

VISION

Vision

At QORPO WORLD, our vision is to pioneer a new era in gaming and beyond. Central to our vision is the creation of AAA-quality games developed in Unreal Engine 5 infused with AI and Web3 elements, setting new standards for immersion and interactivity. Our aim is to open up the Web3 environment to Web2 users, ensuring that they experience no difference in a seamless user experience.

High-quality gaming with AI and Web3 Integration

Our core focus lies in crafting high-quality games that seamlessly integrate AI and Web3 components. By utilizing the power of artificial intelligence, we aim to deliver unparalleled gaming experiences that adapt and evolve with the player, creating dynamic and engaging worlds that feel truly alive. Furthermore, our commitment to Web3 ensures that our games transcend traditional boundaries, offering players new levels of ownership, interoperability, and monetization.

Building a Diverse Portfolio of IPs

Beyond the realm of gaming, we aspire to build a rich and diverse portfolio of IPs - Citizen Conflict and AneeMate that extend into various forms of media and merchandise. From captivating TV shows to collectible merchandise, our IPs will immerse audiences in captivating narratives and memorable experiences, fostering deep connections and lasting engagement.

Gaming as the Foundation, Integration of AI and Web3 as the Future

While gaming serves as our foundational pillar, our vision extends far beyond traditional boundaries. We envision a future where AI and Web3 technologies converge seamlessly, enhancing every aspect of the user experience. Whether interacting with blockchain-based economies or exploring immersive virtual worlds, our games are designed to thrive in both blockchain and non-blockchain environments, ensuring accessibility and adaptability for all players.

OPPORTUNITY

WHY NOW?

Expansive Gaming Market (Multibillion-Dollar Market)

The gaming industry is a huge industry, with revenues reaching staggering multibillion-dollar figures annually. As technology advances and digital entertainment becomes increasingly established in mainstream culture, the potential for growth within this market is virtually limitless. By tapping into this vast ecosystem, QORPO WORLD stands poised to capitalize on the immense opportunities that lie ahead.

Web3 Gaming Sector with Tremendous Potential

While the gaming industry flourishes, the Web3 gaming sector is still in its early stages, offering a vast frontier brimming with unexplored possibilities. As pioneers in this emerging space, QORPO WORLD has the unique opportunity to carve out a significant presence and shape the future of decentralized gaming. With the right strategy and execution, we can position ourselves as leaders in this growing sector, redefining the way players interact with digital experiences and unlocking new avenues for innovation and growth.

Limited Competition

Even though there are lots of chances to succeed in gaming, there aren't as many competitors in Web3 gaming. This is beneficial for QORPO WORLD because it means we can become leaders in this area and get a big part of the market before others see how advantageous decentralized gaming can be. As we move quickly and make smart decisions, we can become the best in the industry and make sure we stay on the forefront.

OPPORTUNITY

THE QORPO ADVANTAGE

- The Next Generation of Web3 Gaming: QORPO is spearheading the advancement of Web3 gaming by leveraging the capabilities of Unreal Engine 5. Our mission is to create an ecosystem that showcases AAA-quality games while integrating seamlessly with the Web3 landscape. By embracing blockchain technology, we aim to bring back the concept of digital ownership and empower players with decentralized, permissionless gaming assets.

- Democratizing Esports through Blockchain QORPO envisions a future where esports is truly democratic and accessible to all. We believe that blockchain technology has the potential to revolutionize esports by making it more transparent, secure, and accessible to players.

- Our web3 gaming platform facilitates the transparent, secure trading of in-game items, giving players full control and ownership over their virtual assets. This means that players can trade their in-game items with other players, or sell them for real-world currency. This gives players more control over their gaming experience, and allows them to earn money from their gaming skills.

- Game Studio Token over Gaming Token. We can still observe the outcomes of the 2020-2021 tokenomics, where economies based on single or dual tokens were supported by just one gaming IP. This approach led to significant opportunities for user acquisition, but it also complicated long-term sustainability. Moreover, investing in a single game poses a greater risk compared to investing in an active development studio with multiple games in the pipeline. $QORPO supports the entire ecosystem, thereby offering maximum utility and long-term potential.

- Our ecosystem currently supports major EVM chains such as BNB, Polygon, and ETH. However, we are actively collaborating with several gaming-centric chains, including Immutable X, to enhance our multichain focus. Additionally, our strategic partnership with Polyhedra Network is paving the way for an omnichain future.

- First-Mover Advantage in AI and Unreal Engine 5 Integration. Our commitment to leveraging cutting-edge technologies such as AI and Unreal Engine 5 further amplifies the opportunities available to QORPO WORLD. By pioneering the integration of AI and Unreal Engine 5 in gaming, we position ourselves at the forefront of innovation, offering unparalleled experiences that set new standards in the gaming industry. As the first to embrace these transformative technologies, we gain a significant competitive edge, establishing ourselves as trailblazers in the industry and attracting players eager to experience the future of gaming today.

OPPORTUNITY

QORPO GAME STUDIO

- QORPO Game Studio is a leading European blockchain gaming developer on a mission to bring AAA quality ecosystem in Web3 gaming. The studio is poised to make a significant impact on the global gaming industry with its diverse expertise, collective experience, and commitment to innovation.

- Backed up by a team of over 65 industry experts and gaming enthusiasts, QORPO Game Studio is building a revolutionary blockchain ecosystem with over 500k users and more than 30 pioneering gaming guilds and esports teams on board. QORPO Game Studio is a Web3-democratizing studio with highly successful IPs, such as esports-dedicated hero shooter Citizen Conflict, and creature extraction shooter AneeMate.

- Our team is composed of young talents and experienced professionals who have worked on renowned AAA titles such as Overwatch, Horizon: Zero Dawn, Arma 3, and Mafia II. We are passionate about creating games that are both fun and rewarding to play, and we believe that blockchain technology has the potential to revolutionize the gaming industry.

QORPO ECOSYSTEM

SEAMLESS ECOSYSTEM PRODUCTS

• Our project is equipped with a fully functional and seamless ecosystem that enables easy onboarding for Web2 users and facilitates their transition to the Web3 world. This streamlined onboarding process is crucial for mass user adoption of blockchain technology. By providing a user-friendly interface and intuitive interactions, we make it accessible and inviting for users to explore the benefits of blockchain within our titles, Citizen Conflict and AneeMate.

QORPO WORLD

• We are building the next generation of custom-developed Web3 gaming platform including the Mission and Rewards Platform, QORPO Identity, and GameFi Marketplace with integrated Wallet. This platform will allow players to earn incentives, own and trade their in-game assets, and compete in esports tournaments on more transparent, equitable, and democratic terms.

QORPO Ecosystem

• **Mission and Rewards Platform**
Users participate in on-chain tasks designed to foster meaningful interactions and cultivate authentic engagement within the QORPO Ecosystem. Rewards are allocated to users based on their activity, emphasizing quality over quantity and prioritizing genuine interactions over artificial ones. The Leaderboard provides participants with an overview of their overall score, earned through task completion, as well as a comprehensive breakdown of their reward distribution schedule upon eligibility at the conclusion of each season.

• **QORPO Identity**
QORPO Identity is an input to the ecosystem, a multichain wallet, and at the same time an authentication provider for Epic Games. Users can register via Web3 login (Metamask) or Web2 social login (Gmail, X, etc.). With registration, we create an Integrated Wallet in the background. QORPO Identity is gathering all the gaming, on-chain and social activity and can be used by the user as a management tool for his NFTs and game assets, but it also gives access to community voting as Governance of the entire system.

• **GameFi Marketplace**
The Market functions as an output from the ecosystem for the user. Anyone can use the marketplace with all the traditional NFT marketplace features and it will primarily serve to monetize gaming assets. Any project can list its collectibles and game assets on the QORPO Market. The primary goal of the marketplace is to maintain users within the ecosystem, where transfers of assets generate revenue through fees from trading on the platform. Revenue will be earned through fees and royalties charged for trades and transactions taking place within the QORPO Marketplace and secondary marketplaces.

QORPO ECOSYSTEM

QORPO
W O R L D

Benefits:

- Seamless user experience: QORPO WORLD provides a seamless user experience by allowing users to sign in to all QORPO products and services with a single account.

- Security: QORPO WORLD is a secure platform that uses industry-leading security measures to protect user data.

- Convenience: QORPO WORLD makes it easy for users to manage their digital assets. Users can store, stake, and trade their assets all in one place.

- Utility: QORPO WORLD is used to access a variety of features on the QORPO platform. This includes participating in NFT drops, staking, and voting on platform governance decisions.

QORPO
WORLD

## Features:
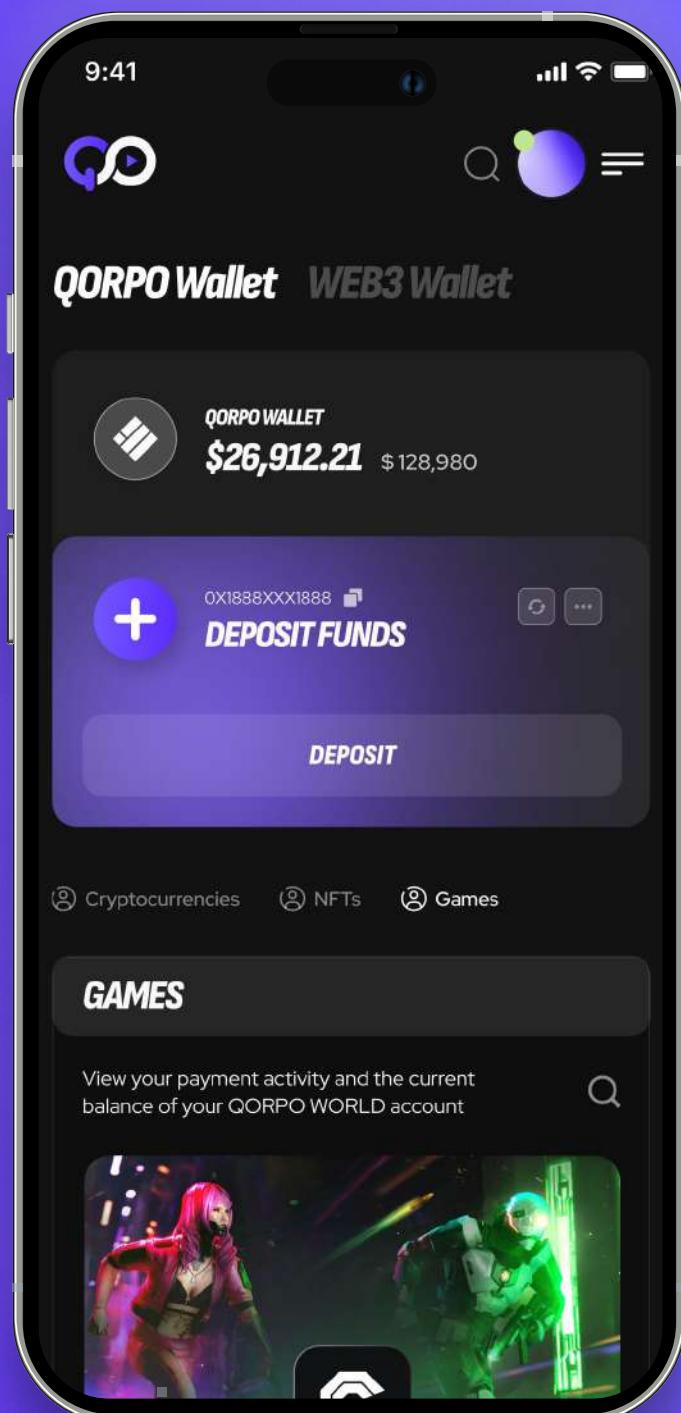

Platform Governance
QORPO Team is always listening to the feedback of the community. There are always ongoing questions about the development, design or marketing topics which can be decided based on the community opinion.

NFT Drops and Campaigns
QORPO WORLD will be used to distribute regular NFT drops and campaigns to users. This will allow users to collect and trade NFTs, which can be used in QORPO games and services. There are several ongoing free NFT minting campaigns for users to interact with.

Esports Management
Users can easily see and manage their esports data inside the QORPO WORLD. They can browse the global leaderboards of players or teams. Anyone can create and manage their own team to get the maximum exposure of gaming.

QORPO ECOSYSTEM

HIGHEST QUALITY TITLES BUILT IN UNREAL ENGINE 5

- Our gaming projects have AAA quality that have already gained substantial traction during its Alpha stages. This demonstrates the game's appeal and potential to attract a large user base within the Ecosystem. By offering a high-quality gaming experience, we would contribute to the overall reputation and attractiveness of the ecosystem.

POWERED BY

UNREAL
ENGINE

CITIZEN CONFLICT

- Citizen Conflict is a free-to-play hero shooter designed to merge the best of both worlds - to deliver the competitive heat symptomatic of the esports game modes as well as tthe Battle Royale frenzy to the masses. The game doesn't fall short on an immersive storyline, which finds three antagonistic syndicates and captivating heroes waging an endless war for dominance. To scale its futuristic dystopian design to the top, Citizen Conflict will brim over with tons of futuristic maps, guns, and uncanny equipment.

- Gameplay - Citizen Conflict offers an engaging and dynamic gameplay experience as a 3rd person hero shooter. Players can expect precise and responsive controls, allowing smooth character movement. As a hero shooter, you can expect a wide array of movement abilities customized specifically for each hero, enhancing tactical options during combat. The shooting mechanics are sophisticated, featuring bullet-tracing, recoil management, strafing, and strategic ammo management to add depth and skill to the gameplay.

- In addition, Citizen Conflict presents a variety of game modes that cater to different playstyles. Players can enjoy classic aim-based modes like capture the point called "Takeover,"

providing fast-paced action and intense battles. For those seeking a more competitive experience, the game offers advanced competitive modes that challenge players' strategic thinking and teamwork like Battle Royale.

Unique Selling Points

- **Esports ready** - Competitive modes, stat tracking, spectator modes, and built-in tournament support are essential elements in a modern gaming experience.

- **Vibrant cyberpunk universe** - Representing an engaging gaming experience with meticulously designed environments, diverse characters, and immersive storytelling.

- **Built in unreal engine 5.0** - With unreal engine 5, we can unsure high performance across a wide range of hardware. Whether players are on a high-end PC or a console, they can expect a smooth, lag-free gaming experience.

- **Web2 & Web3 integration** - Our blend of Web2 and Web3 means we're prepared for the future of gaming.

- **Player-Driven Economy** - Empower your gaming experience in Citizen Conflict with NFT-enabled loot boxes and crafting. You decide when to mint, what to craft, when to sell, and when to withdraw. You collect & own the assets.

QORPO ECOSYSTEM

ANEEMATE

AneeMate is a fantasy world creature extraction shooter merging childhood nostalgia with 21st-century innovation. AneeMates are the mythical creatures you'll truly own, introducing magical powers, unique designs, and body structures. They're designed to trigger the cute sentiment of little kitties while instilling a crippling sense of imminent danger. Their home is mortally threatened. Go save them all!

AneeMate Gameplay

AneeMate introduces players to a captivating gameplay experience where they embark on a journey to rescue and nurture creatures, each with its unique traits and abilities. Players have the opportunity to not only save these creatures but also to become their caretakers, owning and evolving them over time. Evolution is a central aspect of the game, allowing players to enhance their creatures' capabilities and unlock new potential. To facilitate evolution, players must acquire land within the game, creating a symbiotic relationship between ownership and progression. The evolution process itself is going to be powered by advanced AI, ensuring dynamic and adaptive growth for each creature.

Unique Gaming Features

AneeMate brings to life unique gaming features such as the confluence of multiple gaming genres. In AneeMate, players can look forward to a creature extraction shooter that doesn't fall short on adventures, RPG elements, action dynamics, and collectible fun. Paired with a strong focus on storytelling, AneeMate lives beyond mere gaming, it's poised to thrive as a generation IP with merchandise, storyline, and TV shows.

Proper Multiplayer Experience

AneeMate, unlike its creature-catching competitors, offers a proper, highly engaging multiplayer gaming experience that revolves around actionable shooter elements and creature extraction dynamics. This way, AneeMate introduces the thrill of a real-time multiplayer game mode that keeps players at the edge of their seats.

ANEEMATE

Robust Storyline

AneeMate storyline introduces a rich narrative that explores the creation of the fantastical land of Hidden Islands that is accessible only to children. The storytelling in AneeMate explores childhood fantasies, fostering mythical imagery and captivating worlds full of wonders. As the storyline progresses, children who embark on the adventure beyond the Portal that leads to Hidden Islands, are called to save all the AneeMates in the face of adversity imposed by the malicious robots, drones, and Vanguard troops - an enemy group of children misled by an adult who wants AneeMates all for himself. AneeMate's dedication to immersive storytelling opens a new horizon of opportunities for storytelling formats, such as TV series, comic books, or short novels.

Generation IP (Intellectual Property)

AneeMates thrives beyond being just a stand-alone game. This IP is poised to expand throughout multiple popular formats, cementing its wide multi-generational adoption and the following success in mass culture. AneeMate will bring a wealth of comic books, TV series, merchandise, and many different popular formats backed by AneeMate's game lore, captivating narrative, and a rich storyline that intertwines the game itself.

AI Mate

AI Mate revolutionizes how you progress through game talent trees, using advanced AI to make the smartest decisions for your gameplay. It analyses your play style, game meta, and optimal strategies to guide you through the most effective progression paths. Whether you're a seasoned pro or a casual gamer, it tailors its recommendations to suit your level and goals, ensuring a personalized gaming experience like no other.

How does AI Mate work? It uses real-time data analysis and machine learning to understand game dynamics and player objectives, constantly learning and evolving to serve you better. Setting up an AI Mate is a breeze. Just let it observe your gameplay. In no time, you'll receive insights and suggestions for your talent tree decisions, all aimed at maximizing your in-game potential.

Discover a whole new level of gaming experience with AI Mate. Elevate your gameplay, conquer challenges, and breeze through content like never before. AI Mate isn't just an AI; it's your ultimate gaming ally, paving the way for unparalleled gaming excellence. Step into the future of gaming and unleash your true potential with AI Mate by your side. Get ready to level up smarter, faster, and better in-game progression than ever before.

ANEEMATE

AneeMate Social Hub: Connecting Players in a Dynamic Virtual Environment

In addition to its captivating gameplay mechanics, AneeMate features a robust social hub where players can connect and interact in a vibrant virtual environment. At the heart of this hub lies a sprawling lobby, bustling with activity and opportunities for engagement. Within the social hub, players can explore various amenities, including a marketplace where they can trade creatures and land, a gym where they can train their creatures for battles, and a plethora of other intriguing locations waiting to be discovered. Whether forging alliances, engaging in friendly competition, or simply exploring the rich tapestry of the AneeMate universe, the social hub serves as a focal point for community interaction and collaboration.

Unique Selling Points

- High quality graphics - AneeMate boasts stunning and detailed visuals, drawing inspiration from popular titles like Ratchet and Clank and Kena. This aesthetic quality enhances player immersion. Extended universe - AneeMate isn't just a game; it's a comprehensive IP featuring TV shows, merchandise, and other forms of engagement. This broad scope caters to an immersive fan experience that extends beyond the game itself.

- Creature collection and training - A dynamic and engaging creature capture system, much like Pokémon adds an exciting layer of gameplay, encouraging exploration and interaction. There will be plenty of opportunities to level up your character across multiple talent trees and upskill your abilities and stats. You can also look forward to several ways how to evolve your AneeMate and make sure that your monster companion will reach the top of its talent scale.

- Story-Driven action RPG - AneeMate delivers an intricate narrative woven into an action RPG framework. Our compelling storytelling keeps players engaged and invested in the characters and the world. The substantial RPG focus benefits from branched skill trees players level their main characters through. AneeMates, on the other hand, enjoy the potential for growth throughout several evolution stages.

- NFT-Based ownership - With blockchain technology, players truly own their in-game AneeMates, heroes, resources, and skills, providing a tangible sence of achievement and adding a new level of depth to gameplay. This means you can keep, trade, or sell them as you see fit.

- Cross-Platform play - Training of AneeMates and arena combat is compatible across different platforms, including mobile, providing a seamless gaming experience wherever out players are.

TARGET AUDIENCE

Web3 Players and Guilds:

This is a crucial category that we aim to capture from the beginning. The current state of Web gaming presents an untapped opportunity for companies like QORPO Game Studio. As there are no multiplayer live products catering specifically to Web3 gamers and guilds, we have actively engaged with various guilds in the space. These guilds boast a combined total of approximately 1 million active players. Our market research, conducted through personal conversations and consulting with a Web3 agency, indicates that these players are eager to regularly play our game upon its release if it meets their expectations in terms of rewards and quality.

Content Creators

This category is highly significant to us as these players have the potential to generate substantial attention for our product. If they excel in tournaments, it is highly likely they will continue playing our game and create content around it through streaming and YouTube videos. This, in turn, has a multiplying effect on our marketing efforts and increases the game's visibility across various regions.

Web2 F2P Players

The third category encompasses Web2 F2P players, which is the largest category among the ones mentioned. The popularity of F2P products is consistently rising, evident from the substantial revenue growth in the market over the past six years. The continuous growth and demand for free-to-play games provide a significant opportunity for us to attract and retain players within this category.

Professional Esports Players

By offering regular esports tournaments on our platform and the opportunity to win rewards on a weekly basis, professional players will be incentivized to improve their skills in our game and monetize their expertise in between physical tournaments. We aim to provide a platform that supports their professional aspirations and offers an additional revenue stream for them.

NFT & Token Hodlers

One of our primary target audiences includes enthusiasts of NFTs and Crypto Tokens. Our ecosystem offers several benefits and features for NFT users, such as soft staking, leveling, and evolving, as well as various utilities for tokens. Token holders have the ability to stake their tokens, employ them for platform governance, or use them as a medium of exchange within the platform.

„The global gaming industry is booming.”

- Nearly 1 in 3 people on Earth are now playing video games, with 2.8 billion individuals playing at least once a month.

- The average PC gamer is 35 years old, has been playing for 13 years, and has strong purchasing power.

Global Gamers population (Billion)

Year	Value
2016	2,11
2017	2,26
2018	2,42
2019	2,55
2020	2,69
2021	2,81
2022	2,95
2023	3,07
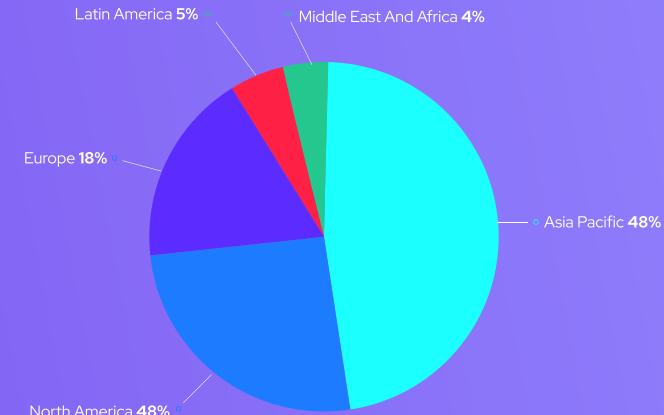

- Majority of the market revenue belongs to the APAC region with a 48% share, with the second and third largest being North America with 26% and Europe with 18%.

Proven recession market

- Gaming has been proven to be an anti-recession industry.

Share of games market revenue worldwide in 2022.

- Latin America **5%**
- Middle East And Africa **4%**

2021	240	249,5
2022	261,2	270,9
2025	318,1	322,7

Global Esports popularity is growing

- The worldwide esports audience has experienced significant growth from 2020 to 2025, with projections indicating a substantial increase in its size. It is estimated that the esports audience will continue to expand, reaching a staggering global audience of over 640 million viewers by 2025.
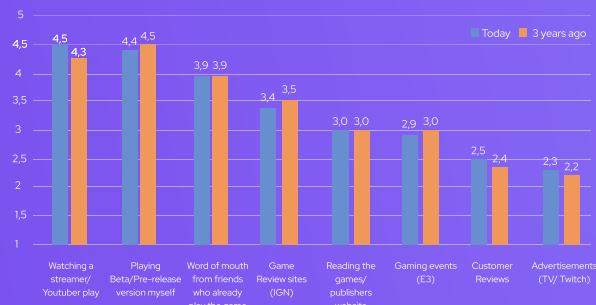

GAMEPLAY ENHANCEMENTS

- The first thing that comes to the mind of a buyer are criteria such as the availability of friends playing the game and well-designed heroes with unique abilities is important for an enjoyable gaming experience.
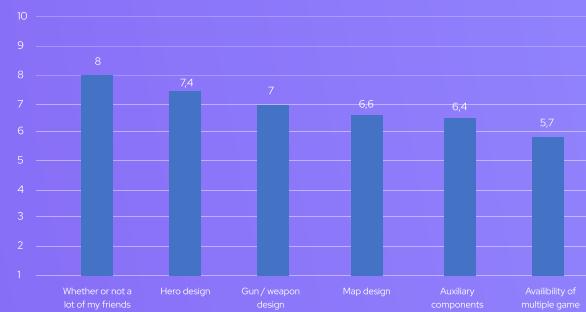

- This chart showcases the marketing focus areas and their impact on game success, including streamer engagement, beta access, word of mouth recommendations, and positive game reviews. By effectively utilizing these strategies, the game can generate buzz, expand its player base, and achieve a higher likelihood of success in the market.

Importance of different criteria when purchasing a hero based FPS

Whether or not a lot of my friends are / will play it	8
Hero design	7,4
Gun / weapon design	7
Map design	6,6
Auxiliary components	6,4
Availibility of multiple game modes / playlists	5,7
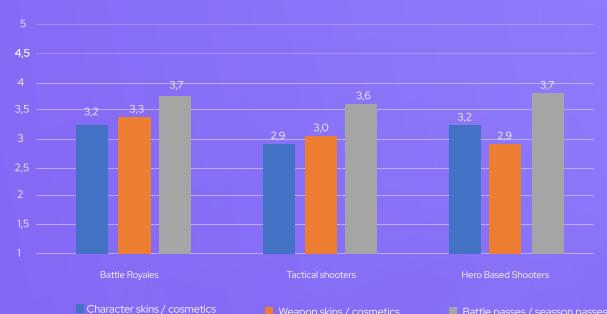

When evaluating an FPS to potentially purchase / play, how important are the below elements to your purchasing decision ? Please score from 0 = "very unimportant" to 10 = "very important"

Fair price perceptions for microtransactions

What do you think is a "fair" price for each of the above types of microtransactions in an FPS?

Use of different channels when Evaluating FPSs to purchase/ play (N=106)

How often do you use the above channels when evaluating whether or not to buy /play an FPS. and how often did you use these channels three years ago ? Please score from 1 = rarely, to 5 = all the time.

Purchasing likelihood for in-game microtransactions

Assuming they are fairly-priced, how likely are you to spend money on the above items within (BRs/ tac shooters / hero-based shooters)? Please score from 1 = not at all likely, to 5 =highly likely.

COMPETITORS & MARKET DEMAND

Low Competition Environment:

The market research conducted by QORPO Game Studio and consulting companies indicates that there is currently a few active competition that specifically focuses on esports democratization and offers a full Web3 ecosystem seamless experience at the same time. We are considering GALA Games as our primary competitor as they focus more on an ecosystem of games or game studios rather than a single game. Most Web3 gaming projects focus on a single-game approach, and the risk of acceptance of the game is always present, so working on different titles is increasing the chance of a successful game.

In the Web2 gaming point of view, we see the potential of blockchain implementation in traditional gaming in various ways. Firstly, it's the true ownership of gaming assets. Secondly, it's the direct monetization level using blockchain as a distribution channel for selling, trading, or swapping the in-game assets or even the whole gaming account.

Through ecosystem products within QORPO WORLD, we establish a distribution channel that enables direct monetization for players and content creators. By utilizing smart contracts, players can engage in peer-to-peer transactions, selling or trading their in-game assets for real value.

All-in-one solutions

The demand is high for a comprehensive platform like QORPO WORLD, which offers a one-stop shop for various services. This includes easy onboarding for players and limitless scalability opportunities, providing a convenient and all-inclusive experience for gamers within the Web3 ecosystem.

Alternative to Web2 Centralization

We offer Web2 quality free of Web2 centralization. The mainstream web has been monopolized by a few 'big tech' companies, which dictate the rules. We leverage the freedom blockchain technology and rising Web3 offers while making sure not to compromise the quality of our products.

Esports:

Our utilization of blockchain technology grants us a competitive advantage in esports. Thanks to the blockchain, we can offer more fairness and transparency to our tournaments due to the ability to log and revise user activity. This enables us to prevent common malpractices such as cheating during matches. As a result, this ability positions us as more trusted esports organizers and partners.

Furthermore, unlike our potential centralized competitors, we emphasize user empowerment and freedom. We materialize this dedication in our plan to offer the opportunity for our gaming communities to organize their own tournaments without third parties involved.

High-Quality Games:

While there are many gaming alternatives to Web2 centralization, almost none of them provides their users with Web2 quality. We pay attention to detail and focus on the quality of development. Therefore, we enjoy a more stable and dominant position in the market of Web3 games.

Accessible Gaming Platform:

We make all of our games accessible in our single platform, QORPO WORLD, which also serves as a digital assets management tool, social hub, DAO voting, and access points to our native NFT marketplace.

COMPETITIVE ADVANTAGES

QORPO WORLD distinguishes itself within the gaming landscape by placing a strong emphasis on pure multiplayer experiences. Unlike competitors such as Illuvium, Palworld, and others, QORPO WORLD is dedicated exclusively to delivering immersive multiplayer gameplay that fosters community interaction and collaboration. By prioritizing multiplayer dynamics, we create an engaging environment where players can connect, compete, and cooperate in real time, forging lasting friendships and memorable experiences.

Citizen Conflict stands out as the flagship game of the entire QORPO WORLD ecosystem. A free-to-play 3rd person hero shooter merges the best of both worlds and delivers the competitive heat characteristic of esports game modes while bringing blockchain innovations to the masses. With Citizen Conflict we are focusing on Esports Integration, which will bring opportunities to participate in or have access to special esports events, and Prize Pool Tournaments.

AneeMate strives to be the first and proper multiplayer gaming experience, such as a Pokémon creature game on the blockchain with a deep AI integration. A captivating fusion of adventure and RPG, seamlessly blending elements of creature extraction and shooter intensity with the enchanting world of AneeMates. This action game revolutionizes the beloved concept of little creatures, incorporating Pokémon-style graphics and extraction shooter mechanics, making it a truly unique addition to the realm of Web3 gaming.

TARGET AUDIENCE

- **Web3 Players:**
As a co-founder of Crypto Oasis Games Guild, the biggest UAE gaming alliance, we are cementing our relevance as a thriving Web3 game developer powered by 60+ industry experts and over 450k users. We focus on gaming & esports, blockchain, and NFTs.

- **Web2 Players:**
Besides the top-notch quality unparalleled in Web3, we are making our games accessible to traditional mainstream users. We build all our games in Unreal Engine 5 to meet the most up-to-date industry demands. Therefore, game titles such as Citizen Conflict and AneeMate are crafted to bring Web2 quality while taking advantage of blockchain technology in the most accessible way.

- **Gaming Guilds & Teams:**
Our main focus is on the democratization of esports and competitive gaming. Since we pay attention to team play and tactics, we have a competitive edge in attracting professional esports teams and Web3 gaming guilds. After the initial round of esports tournaments, we managed to attract over 35 leading teams in three categories, backed up by a $10,000 prize pool sponsored by Qtum Foundation.

- **Esports Enthusiasts:**
We are ready to draw users across Web2 and Web3 thanks to the competitive game quality and the ability to offer a sustainable reward system distributed through esports tournaments with generous prize pools.

- **NFT Collectors:**
We spearhead blockchain game development by merging AAA games with captivating NFT designs crafted in state-of-art 3D creation engines. With our esports designation, we democratize competitive gaming with user-friendly infrastructure and empower players with true ownership, offering a plethora of enticing and utility-rich in-game assets.

- **Web3 Curious Individuals:**
From among the mainstream users, we are ready to easily attract all those who show curiosity in modern technology and innovation. We are dedicated to crafting robust and detailed educational content that simplifies the complexity of blockchain-related topics while offering easy-to-use infrastructure that connects newcomers with Web3 seamlessly. Our user experience is akin to drag-and-drop simplicity, and our blogs, videos, magazines, newsletters, and partnered publishers frequently educate a wide range of regular users in Web3, blockchain, crypto, and NFT topics.

COMMUNITY ONBOARDING

WEB3 GO-TO-MARKET STRATEGY

QORPO WORLD is acquiring new Web3 users in multiple ways as launching our games on TOP Web3 Gaming platforms, and consistently creating new marketing campaigns, with the most famous Web3 Influencers. To multiply the effect of onboarding new Web3 users we have already created an ambassador program for our long-term and loyal Supporters in Web3 Space.

QORPO WORLD has created 2 Genesis Collections with a market cap of over $4M, which has a huge impact on onboarding new Web3 users, and NFT Holders. NFT Genesis Collections are connected with the Mission and Rewards Platform, where NFT Holders are incentivized to Stake and Hold their NFTs and get rewarded for that. Users are also able to complete On-Chain and Off-Chain tasks in our Farming Campaign and collect Rewards.

In QORPO WORLD we are creating an environment that aims to maximize incentives for Web3 Users, thanks to it they can be rewarded. As a Gaming Ecosystem Studio, we are also focusing on utilizing our games for players, who can complete In-game Tasks, and get rewarded for that. Our main goal is to create more gaming content for the players and that is what can bring an incentive to play and collect the rewards.

Onboarding Web3 Gamers is necessary to create an On-Chain transaction. Revenue from those transactions Will be used for treasury, burning, and genesis collection distribution. The success of the games means hype and a lot of traction which will bring many players to the ecosystem. After that, the more people want to Mint an NFT, the more revenue the company will get for Token Burning, which will have a heavy impact on the $QORPO token.

WEB2 GO-TO-MARKET STRATEGY

QORPO WORLD is acquiring new Web2 users through alpha and beta testing of their IP-branded games, targeted marketing, which is focusing on South-East Asia and Latin America, hosting online and offline eSports tournaments, collaborating with eSports organizations, and launching games on platforms like Steam and Epic Store.

USER ACQUISITION STRATEGY

Since our ecosystem is connecting web3 gaming & NFT audience, web2 traditional gamers and creators but also native cryptocurrency investors we need to specify the strategies for each of the target audiences.

Native Web3 NFT & Gaming Audience
This is currently our strongest network audience due to our presence in the market since 2019. We have been and continue to actively collaborate with prestigious creators & NFT Whales such as Dingaling, Grail, and syndicates like Neo Tokyo or Project Godjira. In total, we have more than 50 active supporters who highlight and share our biggest milestones and announcements, play and stream our game, as well as attend our regular X mega spaces.

We have an ongoing farming campaign where native web3 users engage in ecosystem, social, and gaming activities to participate in the leaderboard, leading to monthly airdrops. Currently, we're working on a major update on the QORPO World platform and campaign with the biggest web3 farming creators to promote these opportunities and further expand our native web3 community.

Moreover, we regularly partner with major projects and communities like Portal Coin, Revolving Games, etc. Additionally, we've signed a deal with Pixelmon to include us in their cross-IP farming incentives, bringing more than 400,000 users into our platform. We see this strategy positively impacting our KPIs, and we plan to continue it in the coming months.

Native Cryptocurrency Holders
Within our internal KOL network of investors in $QORPO, we have more than 50 major influencers who actively support awareness of our token (e.g. ASH Crypto, Ibcig, KriptoMessi, Virtual Bacon, etc.). They regularly promote our token, its utilities, and ecosystem potential, and share our major milestones.

We're also one of the first winners of the Cointelegraph accelerator, which provides strong and active support on the PR and media side. As part of our deal, we've co-developed a QORPO x Cointelegraph GameFI hub - a subpage on the main Cointelegraph page where we are the main editorial project, deciding on the content, other projects, and topics to promote.

Our strategy with only one token backing the gaming ecosystem helps us scale awareness of the token with more games and products coming to the ecosystem, as well as helping us scale utilities within our upcoming B2B QORPO Launchpad plans for 2025. The more games and projects enter the ecosystem, the more users from different gaming segments will focus on the single $QORPO Token.

USER ACQUISITION STRATEGY

We're also planning to deploy more token liquidity in different chains and DEXes. We started with ETH - UniSwap, followed by BNB - PancakeSwap, and we're currently discussing offers from ARB, SUI, SOL, AVAX, and Polygon. With the support of their major DEX partners, we aim to attract more token holders and traders across multiple blockchains.

Casual Gamers, Esports teams, Creators:
Firstly, both of our games are Free-to-Play, which gives us a strong foundation for user acquisition and effective marketing funnels. Secondly, Citizen Conflict is already live on EPIC Store, which is our first step. We're working on getting both of our games on STEAM to gain maximum possible exposure within the Web2 publishing.

We've also signed a deal with a huge Esports organization gathering tens of strong Esports players (E.g. Faze_Sway, Reet, etc.) who will conduct a 2-month campaign by the end of April/early May, promoting Citizen Conflict within the traditional gaming audience and Esports community. Additionally, the founder of FaZe Clan - Banks, is our strategic token investor and will assist us in reaching the right people in the acquisition strategies.

Our games are built in Unreal Engine 5 with the highest graphics quality, bringing unique game modes and excellent gameplay experiences, making them suitable for entering the traditional web2 gaming market.

Lastly, our native social community, exceeding 500,000 followers, provides a strong foundation for our user acquisition strategy.

COMMUNITY ONBOARDING

USER EDUCATION

We believe that the most effective way to acquire millions of Web2 users and introduce them to Web3 opportunities is through accessible and comprehensive educational content. Therefore we emphasize our content development activities on our blogs through newsletters or via our media partners.

Easier Web2 User Acquisition:

Resources put into informative and educational content serve as an avenue to address and effectively attract a broad range of audiences in Web2.

Raising Web3 Awareness:

Since we are raising awareness of blockchain technology and informing about the pros and cons of Web3, we are able to build trust and become the go-to platform for innovation and technology curious individuals.

Raising Willingness to Act:

Informed and educated followers are more likely to become active here-to-stay users. By elevating the knowledge and awareness levels of our users and followers, we are effectively fueling their willingness to take action.

Value of Informed Decision-Making:

After years of experience, we learned that informed users prove more valuable and committed to the projects they are involved with. Therefore we support informed decision-making among both our long-time users and newcomers.

ESTABLISHING COMMUNITY

We don't harvest users; we establish the community. The customer journey we architect doesn't end after the signup. By providing our users with ample opportunities and catering to their sense of belonging, we are fastening user retention.

Feature-Rich Social Platform:

Besides a multitude of aforementioned functionalities, QORPO World serves as a powerful social hub that connects users, players, and friends. We encourage our users to chat, talk, share their experiences, and strengthen their relationships. The strong community supports user retention and attracts even more newcomers.

DAO Voting:

The voice of our community is heard. We allow our users to express their opinions and vote for the essential stages of development and participate in decision-making on the direction of our projects. By elevating the community-based side of our platform, we once again add volumes to our user-retention capabilities.

Community-Empowering Token:

We empower the community with a multi-purpose, anti-inflation token designed to thrive. The vast investment opportunities accessible for both players and investors empower the token while gluing a sense of unity within the community.

Team-Based Games:

The community-based character of our projects is highlighted by the nature of our games' gameplay that emphasizes strong team play and shared experiences.

TOKEN ECONOMY

QORPO TOKEN

Empowering the Community, Enhancing Gaming, and Fueling B2B Solutions
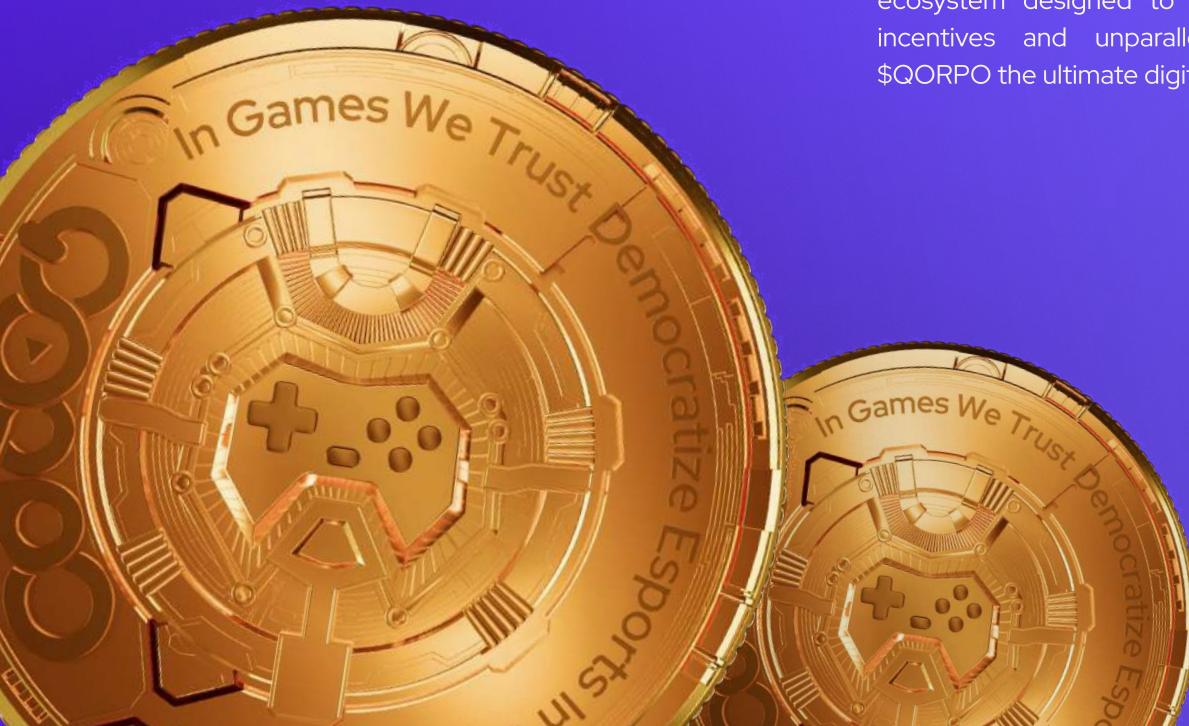

QORPO was minted as an ERC-20 token on the Ethereum Mainnet. During the Token Generation Event (TGE), a total supply of 750 million QORPO tokens was generated, and there are no plans to create or mint any additional tradable tokens in the future. The total token supply will only decrease over time via various burning and deflationary mechanisms tied to the token economy.

Holders of token will have access to a range of exclusive benefits and incentives within the expansive framework. The team has meticulously crafted every aspect of the ecosystem to provide exceptional utilities to token holders, ecosystem users, and players.

UTILITY TOKEN

We introduce a universal token that powers communities and fuels B2B solutions. $QORPO Token unites all our games and products, making it a multi-purpose token. This token has been specially designed to serve as a universal ecosystem token for all of QORPO's products. It is now easily manageable within the QORPO World, making it highly scalable with the growing number of game titles within the QORPO ecosystem.

Stake your tokens for monetary and gaming benefits, and prosper from ingenious buy-back mechanism providing additional demand on market. Deflationary model, tied to QORPO ecosystem & B2B solutions, creates a long-term decrease of token's circulating supply. Join the ecosystem designed to provide multifaceted incentives and unparalleled utility, making $QORPO the ultimate digital asset.

TOKEN ECONOMY

UNIQUE GAMING ECOSYSTEM

QORPO WORLD

- Wallet
- NFT Marketplace
- Game Launcher
- Farming & Staking Hub

GAMES

- Citizen Conflict
- AneeMate
- B2B Games

The entire gaming ecosystem is powered by a single token. However, the foundation of the QORPO ecosystem is linked with various external entities and audiences. We are focusing on three types of economies: the Token economy, the NFT & Web3 economy, and the Web2 economy. Each of these economies has distinct inputs, approaches, and connections to the $QORPO Token.

TOKEN ECONOMY

TOKEN ECONOMY

TOKEN UTILITIES

ECOSYSTEM TOKEN
The QORPO Token is integrated into all gaming titles and products developed under QORPO Game Studio providing utilities scaling opportunity with expansion of the ecosystem.

ONBOARDING WEB2 GAMERS
The QORPO Token will be used as minting currency for in-game digital assets into NFTs, bringing gamers from the traditional gaming field to the web3 space. Once the token is used for the minting purpose, it will be burned.

PLATFORM GOVERNANCE
The $QORPO token allows hodlers to have a say in crucial decisions through frequent platform voting accessible directly from their QORPO WORLD dashboards.

MEDIUM OF EXCHANGE
Users will be able to use the token as a currency for various activities, including buying and selling in-game assets, minting NFTs, trading on the marketplace, and engaging in crafting within the player-driven economy.

BUYBACK & BURN
A percentage of ecosystem revenue is used to regularly buy back the $QORPO token on exchanges, promoting scarcity and driving up demand for the token. Part of the bought-back tokens will be burned forever, decreasing the overal supply.

SCALABILITY INTO B2B
As part of QORPO WORLD's B2B expansion strategy in the coming years, there will consistently be conditions linked to the $QORPO Token economy. Gaming partners joining the platform will be required to offer additional utilities to the native $QORPO Token holders.

STAKING
This is one of the most important and mostly probably utilized utility of the token. There will be several staking opportunities for players, hodlers, investors, NFT hodlers and token traders. Each having different entry point and outcomes.

PLAYERS INCENTIVES
A portion of the token will be regularly distributed among various community and gamer incentives over the years. This will be also linked to the revenue and will consider four main groups: players, platform users, token holders, and NFT holders. The main ways to get the token is gaming activity, utilizing QORPO platform, social activities and NFT & token assets holding.

STAKING OPPORTUNITIES

Staking
We are thrilled to announce the introduction of $QORPO token staking, which will be available in several forms, each offering unique rewards. This initiative not only supports the token but also opens a variety of investment opportunities to a broader audience.

Staking for Players
We've made staking incredibly accessible to all players and token holders. With a minimal number of tokens required, gamers can enjoy exciting in-game rewards, including exclusive NFT drops, frequent discounts on in-game purchases, and other enticing benefits. This form of staking enhances the gaming experience while offering the advantages of being $QORPO token holders.

Staking for Creators
Creators are a crucial part of our ecosystem and will benefit from the staking program. Those who stake $QORPO tokens will engage in an innovative referral program, receiving royalties from NFTs created in QORPO WORLD.

NFT Staking
Recognizing the value of NFT assets in our economy, we are introducing a unique staking mechanism for NFTs. This allows holders to earn in-game currencies and points, leading to higher tiers of rewards.

Fixed APY Staking
Lastly, we are preparing a casual staking program with a fixed APY, which will play a critical role during key stages of token development.

For the avoidance of doubts, token holders have no rights to revenue.

TOKEN ECONOMY

HOW DOES THE SUCCESS OF THE GAME IMPACT THE TOKEN?

Our priority is to make sure, that the success of the game has a direct impact on the token, because in the end, it's the token's impact, that is necessary for the project.

Game Content

The main duty of our user growth strategy is the creation of compelling game content because we are aware that High-quality games are the key to impressing a lot of content creators, casual or pro players, and new users to the QORPO Ecosystem. By achieving this regularly, we are ensuring the consistent growth of our community. Citizen Conflict and AneeMate serve as the backbone of our ecosystem, captivating players with rich narratives, dynamic gameplay mechanics, and endless opportunities for exploration and interaction. By delivering high-quality content, we not only attract users to our platform but also create much stronger pressure on creating transactions and minting NFTs. The result will be a Higher Demand for the $QORPO Token and a deflationary effect due to a Burning from the minting of NFTS & revenue of the Fees.

User Growth

Our user growth begins with targeted marketing initiatives designed to attract individuals to our platform. Through various marketing campaigns, we reach out to potential users, showcasing the unique features and benefits of our ecosystem. As users join our community, they become part of a vibrant network where engagement and participation are rewarded.

Citizen Conflict Incentives

We created a plethora of incentives for the players such as access to special game events, weekly drops, unique in-game skins, and discounts on battle pass purchases.

AneeMate incentives

Players of AneeMate will be able to purchase the Season Pass and get several benefits from it. Players with a Season Pass in Season during its duration will receive a new form of content and access to mint unique AneeMates that will have unique features. Only users who have purchased this Season Pass will be able to enjoy these in-game benefits. The main goal is to favor those who incentivize in the ecosystem and own a Season Pass. This also puts pressure on the users and players to mint these unique NFTs in-game.

User Mint NFTs
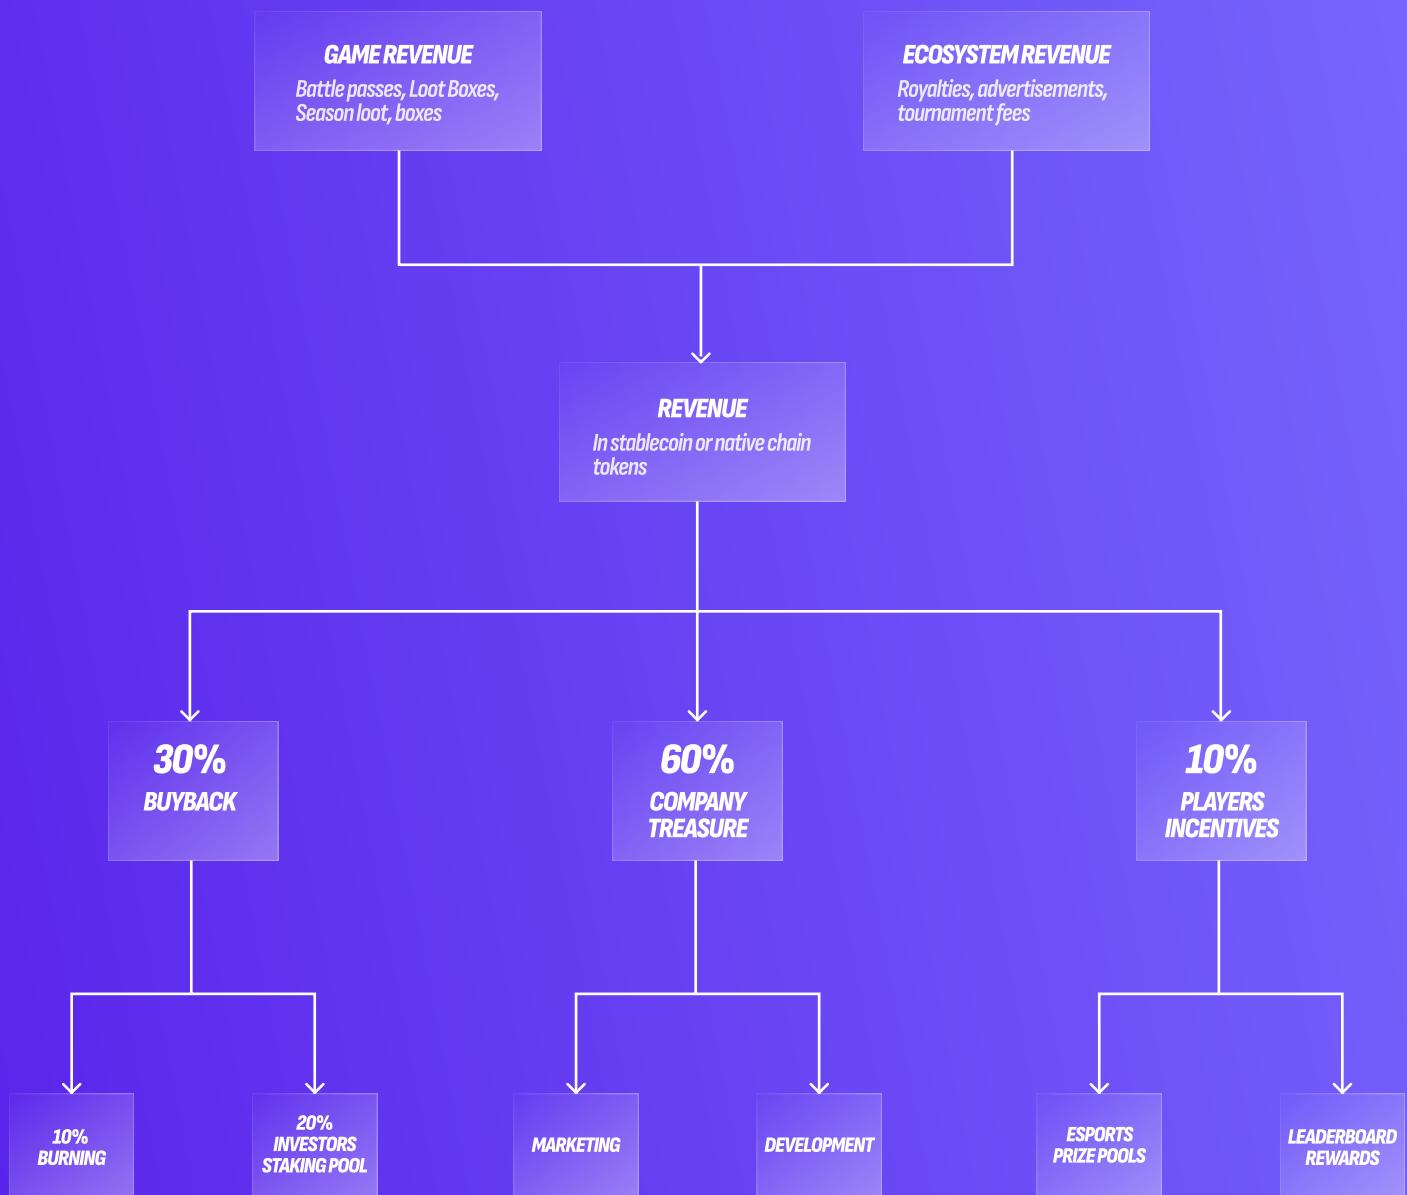

As users dive deeper into our ecosystem, they have the opportunity to mint their own non-fungible tokens and enter into the Web3 world. By minting NFTs, users not only gain ownership of unique digital assets but also contribute to the demand for $QORPO tokens. Users are motivated to mint each unique asset as soon as they can because it gives them the best minting number on assets and collectible pass. Each minting transaction requires fees in $QORPO tokens and part of the tokens will be burned forever. This brings more token utility, decreasing the overall total supply and fostering deflationary effect.

Token Impact
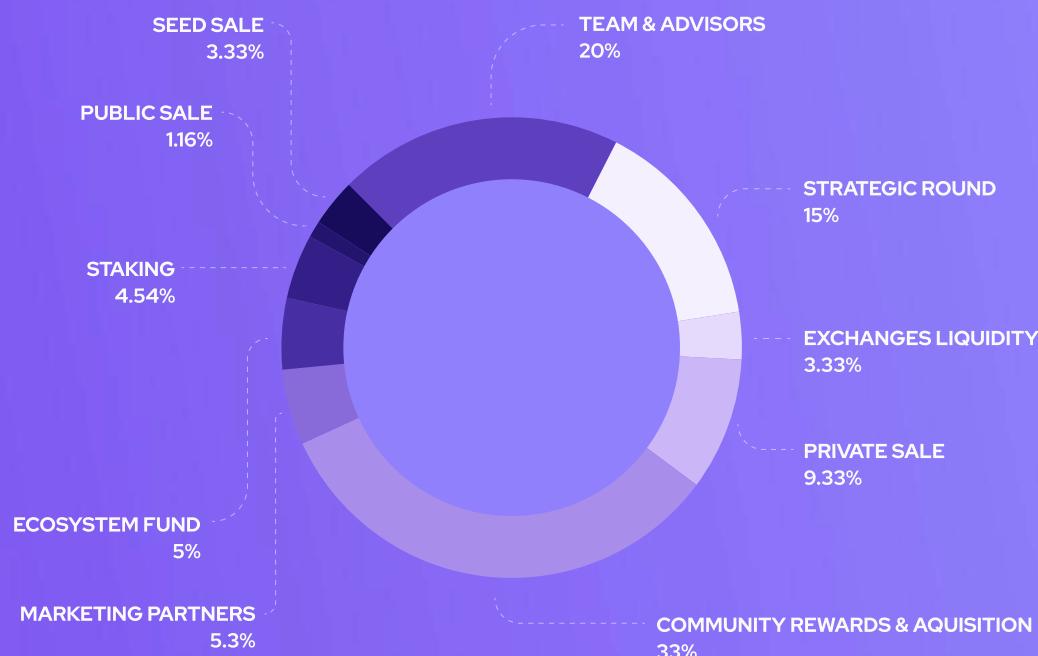

The impact on QORPO Token depends on the amount of proceed transactions and minted NFTs. When users participate in our ecosystem by completing the On-Chain tasks, thanks to their transactions, they will contribute to building revenue, which subsequently creates a positive impact on the token due to Buy-Back & Burn mechanisms.

NFTS & WEB3 ECONOMY

The QORPO Ecosystem is designed to cater to and incentivize three distinct participant groups, each playing a vital role in the ecosystem's dynamics. These groups, integral to the financial and operational structure of the ecosystem, include:

1. Token Holders: Individuals who invest in and hold $QORPO Tokens, playing a crucial role in the token economy.

2. NFT Holders: Users who possess NFTs within the ecosystem, contributing to the robustness and diversity of the digital assets market.

3. Gamers: Active players engaged in our games, who form the backbone of the user base and drive the interactive element of the ecosystem.

To reward and encourage continuous engagement from these groups, we have developed a dual reward system. This system includes innovative reward mechanisms like seasonal leaderboards that distribute airdrops to top contributors, and the provision of $QORPO Boxes, which contain various amounts of $QORPO Tokens. These incentives are designed to enhance participation and trust in our ecosystem, thereby fostering a thriving and interactive community.

SEASONAL LEADERBOARD – AIRDROP MECHANISM

QORPO launches the First season of Airdrops of $QORPO Token for Ecosystem supporters and active users of the platform.

QORPO Establishes a leaderboard with through Point system through activities such as:
1. Holding NFTs – 25% share of total points pool
2. QORPO Token Holding – 25% share of total points pool
3. QORPO Gaming stats – 50% share of total points pool

Each action grants you a certain amount of points – this amount will be accumulated during the entirety of the campaign and by the end of the campaign, you'll get assigned to the special "Tier" of the Leaderboard – this tier represents the % share of the entire token pool that you've earned during the event.

The allocation of percentages in our reward system has been meticulously designed to establish a democratic balance between passive ecosystem investors and our active player and user base. This approach ensures a fair and equitable distribution of benefits, aligning with the interests of all participants in the ecosystem.Main Tier system consists of 10 Tier level rewards. Upon reaching the level through our point system, user continually unlocks the additional token rewards for the specified pool. The general idea is to finish ALL weekly tasks for ALL categories to get the maximum amount of weekly points. Based on that, the user gets assigned a Tier gradually and receives a portion of the tokens for the Tier. Users joining each Tier are eligible to receive a proportional cut of each category.

SEASONAL LEADERBOARD – AIRDROP MECHANISM

Token hodlers monetization

1. Token Staking with several staking pools and opportunities
2. Airdrops for holding on-chain – Token snapshot/NFT Drops
3. Other activities lead to points based on the criteria with various multipliers. Season Leaderboard Airdrop - Payout based on their Tier placement

NFT Hodlers monetization

1. NFT Staking – NFTs have various rarities
– Loyalty Bonus for long-term holdings
Example: Hold NFT for 30 days -> example – Get 1% bigger rewards / Hold NFT for 90 days -> Get 3% bigger rewards
2. Airdrops for holding on-chain – NFT Snapshot/NFT Drop
– get in-game currency that can be used for spending in-game

3. Other activities leading to points based on the criteria with various multipliers

Gamers monetization

The main condition for Gamers to earn tokens is to be the owner of a battle pass, which is going to be the cheapest way for users to be eligible for receiving leaderboard points. This group will be heavily tied with the marketing engagement and UGC, as this is the biggest value provided to this group of users.

Gamers can earn by:
1. Spending in-game currency for
   a. QORPO Boxes
Players will be able to purchase boxes for in-game currency and unbox $QORPO Token
   b. Owning a Battle Pass
Battle Pass grants a limited amount of points per week from purely gaming activity.
   c. Team Pass
Team Pass allows you to get points from the team instead, in case you are not available to play or your solo score will be lower than the fraction of the team's score.+ qorpo box for owner

2. Leaderboard Season Airdrop
3. NFT Mint – Marketplace Trading
   a. Players are able to mint digital assets received from the game -> will have to mint as NFTs → and resell them on QORPO market or secondary markets
 4. Tournaments with Prize pool
   b. Once the tournaments are announced, players will be able to win tokens through special events

Gaming activity is the biggest seasonal sub-group for earning points to the leaderboard - grasping a total of 40% from the Leaderboard points pool.

QORPO BOX

The QORPO Box will contain various values of the $QORPO Token, along with other incentives. Different rarities of the box will be available for players to obtain, and they can use it to convert their accumulated in-game currency into tradeable $QORPO Tokens.

QORPO Box

QORPO Box includes ONLY $QORPO Token and is opened for CCASH or MATE in-game currency - the price is 10,000 of each.

Opening a box can grant various amounts of tokens, ranging from - 0,1 to 10 000 $QORPO.
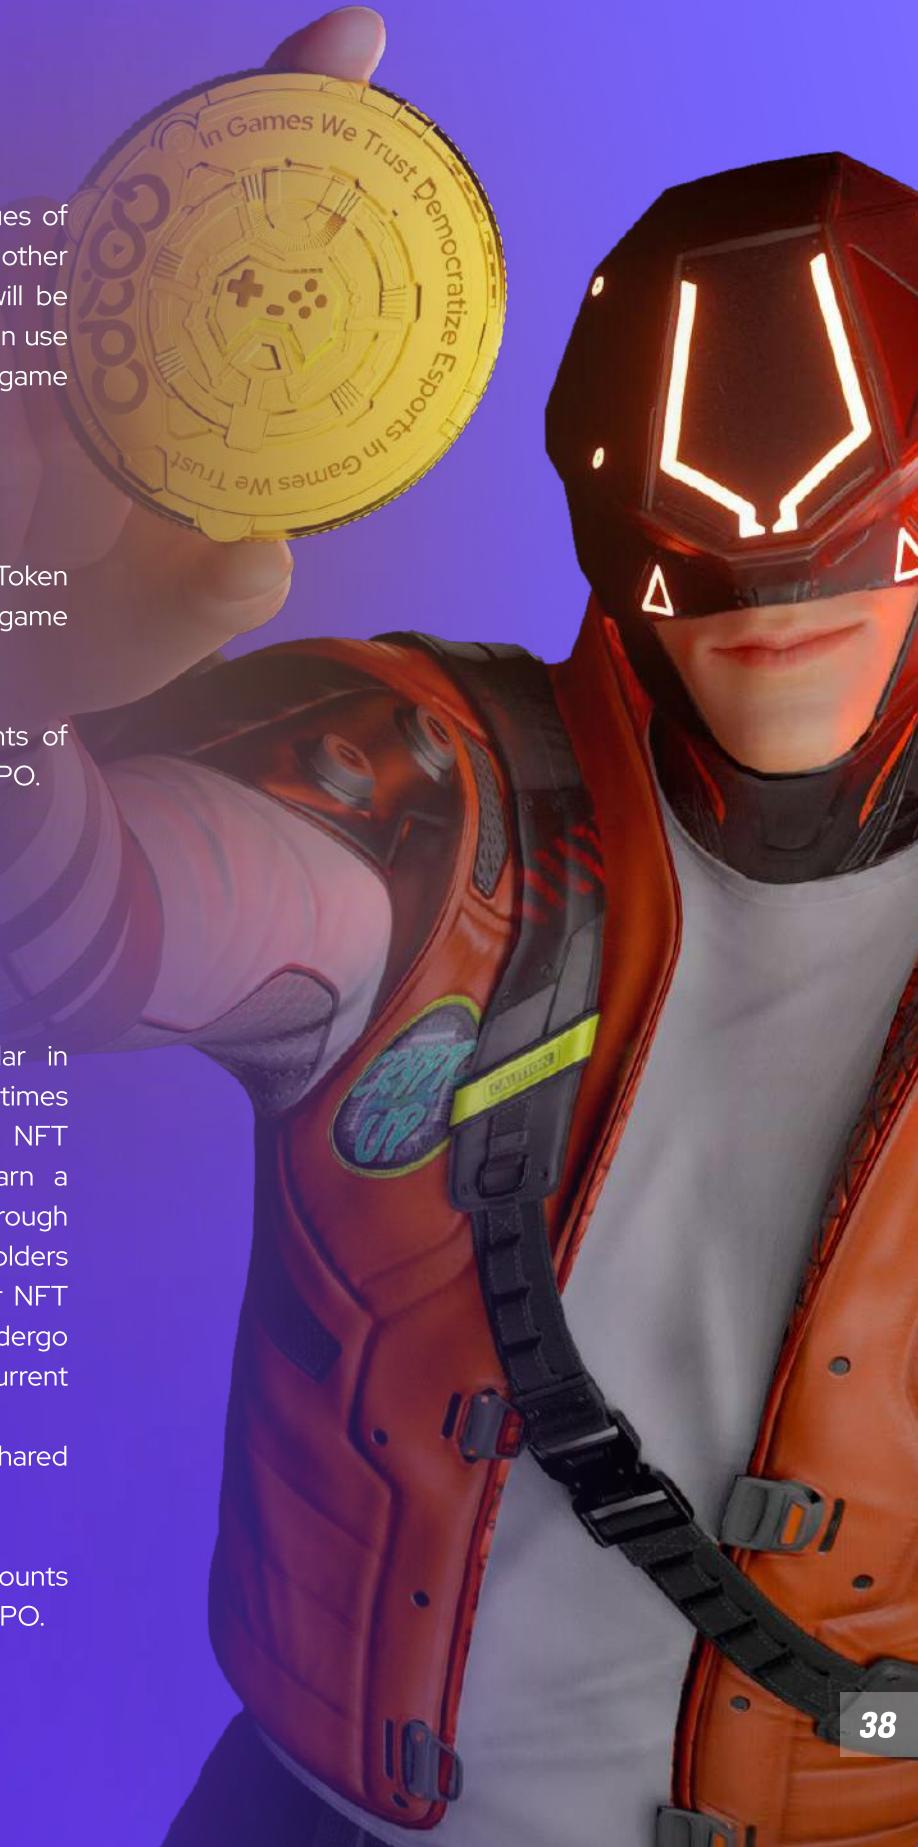

- 1 CCASH & MATE = $0.01

Elite QORPO Box

The Elite QORPO Box, although similar in concept to the standard box, will be 10 times more expensive and intended mainly for NFT and Token Holders, or players who earn a substantial amount of in-game currency through NFT models. The box's accessibility for holders will be proportionate to the value of their NFT Collection. The pool of rewards will undergo regular updates in allignment with the current season.
BOTH QORPO Boxes have the same shared prize pool of Tokens.

Opening a Elite Box will grant a various amounts of tokens, ranging from 0.1-100,000 $QORPO.

QORPO B2C

QORPO B2C is the consumer-facing arm of the business, targeting individual players, collectors and traders. It encompasses two key components: QORPO WORLD and QORPO Games.

QORPO WORLD
QORPO WORLD is a native ecosystem platform that integrates all QORPO products and services under one roof. The platform includes Citizen Conflict, AneeMate, and NFT marketplace, empowered by esports interface. QORPO WORLD also functions as a wallet for storing and staking $QORPO tokens. On top of it, users can easily manage and transfer their virtual gaming assets and NFTs with no fees within the platform and other ecosystem products.

QORPO Games
Flagship titles like Citizen Conflict and AneeMate are at the core of QORPO's business. These games serve not only for user retention but also generate revenue through various channels. Sales of in-game assets, microtransactions (e.g., season passes, tournament tickets), and NFT marketplace fees contribute to the revenue generation strategy. Furthermore, each of our games will feature special follow-up DLCs designed to further engage the community and reinvigorate interest among long-time players.

REVENUE GENERATION STRATEGY B2C

Sale of assets & subscriptions
The studio will generate revenue by selling digital assets & NFTs related to battle passes, loot boxes,in-game characters, weapons, skins, cosmetics, and other collectibles.

Microtransactions
Leveling/Evolving of assets, tournament tickets, and other in-game microtransactions will provide a steady stream of revenue.

NFT Marketplace Fees & Royalties
Revenue will be earned through fees and royalties charged for trades and transactions taking place within the QORPO Marketplace and secondary marketplaces.

DLCs
Releases of special follow-up DLCs for each game, aimed at increasing player engagement and retention. These DLCs will not only revive interest among existing players but also serve as a key revenue stream by offering unique, value-added and paid content.

QORPO B2B

QORPO B2B focuses on serving other projects and businesses by providing them with platform services, whitelabel solutions and modular gaming framework. This division is divided into two options: products and services.

PRODUCTS
The studio will offer QORPO WORLD, and a modular gaming framework as whitelabel solutions. This allows other projects with ideas, designs, and communities to quickly access the QORPO ecosystem without the high cost and time investment on self-development. The products are available for a one-time purchase, giving buyers the freedom to choose between using QORPO's services or creating their own solutions.

SERVICES
The services offered are primarily associated with QORPO WORLD platform opportunities and white-label products. Projects and studios integrated within QORPO WORLD platform will be paying listing fees, promotion and marketing packages, etc. In case of white label solutions, fees will be implemented for providing technical support and user database management. The services are provided on a subscription basis, allowing projects to pay monthly, quarterly, or annually based on their needs and preferences

REVENUE GENERATION STRATEGY B2B

Listing on Platform and Management
Games and projects will be providing an onboarding fees, marketing budget and other promotional packages.

In-Game Advertisements or Branded Tournaments
Partnering with businesses for in-game advertisements or branded tournaments creates additional revenue streams.

Licensing QORPO WORLD
as a white-label solution for other platforms brings in revenue from partnerships. Strategy allows the studio to earn revenue through licensing, transactions and volume.

Modular Gaming Framework for Start-up Companies
Offering a direct solution for startup companies unable to build AAA quality games with their own resources generates income for the QORPO Game Studio.

Monthly Income from White Label Services
Providing technical support and user database management as subscription services to white label clients generates a consistent monthly income.

By combining both B2C and B2B revenue streams, QORPO Game Studio can create a well-diversified business model around token that ensures sustainability, growth, and a strong presence in the gaming industry. The ecosystem approach, supported by QORPO WORLD and engaging game titles, enhances user acquisition, retention, and ecosystem awareness, making QORPO Game Studio a key player in the gaming market.

B2B QORPO Launchpad
The following B2B strategy is to create a QORPO Launchpad for external gaming projects. Gaming Studios willing to join the QORPO Ecosystem at its fullest and utilize the technology, brand awareness, and community can conduct an NFT Genesis Launch, Token Public Sale, or Game Listing on the QORPO World platform.

Holders of $QORPO Token will be granted whitelists for the drops, gaming assets drops, discounts on battle passes, and other incentives.

TECHNOLOGY & INNOVATION

Game technology

One of the most critical factors of success is adaptation. QORPO game development road started as a Unity-based project, but we've quickly understood that we have to use the most innovative technology to create the best product on the market. In the span of a few months, the entire production has been migrated to the new, more advanced technology to meet our expectations.

Unreal Engine 5   UNREAL ENGINE

EPIC Games's Unreal Engine is the standard for AAA games. Unreal Engine 5 was fully released in April 2022, and the features are mind-blowing. Nanite introduces a dynamic mesh system that allows for complex and fast textures. Lumen introduces fully active global illumination, meaning you can see diffuse bounces in real time. Unreal Engine's graphical capabilities are far ahead of the competition. Due to the above-stated reasons, Unreal is the obvious choice for building games..

Blockchain Technology

The horsepower of crypto-based projects. Blockchain technology powers the $QORPO ecosystem granting incentives for multiple types of users. Players are true owners of in-game assets across the supported public blockchain.

BNB Chain   BNB CHAIN

BNB Chain belongs to one of the most used networks in the whole industry. Some of the main advantages are cheap operations with an average price of $0.15 since the genesis block, fast adoption rates, token migration through bridging, and extremely powerful funding that assures the stability of the product's continuous support.Chain is fully supported in QORPO WORLD platform and also several gaming NFT collections have been minted on BNB.

Immutable X   Immutable

Immutable X is a layer-two solution secured by Ethereum, focusing on NFT minting and Web3 games. It is powered by StarkWare, a scaling solution for Ethereum that allows Immutable X to offer gas-free minting of NFTs. QORPO WORLD will integrate Immutable X on the platform using their ZKEVM as well as gaming assets for Citizen Conflict.

POLYGON   polygon

Polygon is a layer-2 scaling platform that enables fast, easy, and secure off-chain transactions for not only payment transactions, but also generalized off-chain smart contracts.Polygon is famous due to its scalability, high throughput and public side chains. QORPO is utilizing Polygon on the platform for smart contracts and deployed several in-game collections on the network.

TECHNOLOGY & INNOVATION

ETHEREUM ethereum

Ethereum is a decentralized, open-source blockchain that enables developers to build and deploy smart contracts and dApps. It is also the most popular blockchain for NFTs and collectibles. QORPO will mint both – $QORPO token and Citizen Conflict genesis NFT on the ETH mainnet.

POLYHEDRA NETWORK Polyhedra

Polyhedra Network is at the forefront of developing infrastructure for Web3 interoperability, utilizing cutting-edge zero-knowledge proof protocols. This pioneering approach in omnichain blockchain development is integral to supporting QORPO's multichain vision, enhancing the overall user experience for players.

AMAZON WEB SERVICE aws

AWS is leading comprehensive, evolving cloud computing platform provided by Amazon that includes a mixture of infrastructure-as-a-service (IaaS), platform-as-a-service (PaaS) and packaged-software-as-a-service (SaaS) offerings. QORPO is utilizing AWS services within the gaming ecosystem.

ANKR ankr

Ankr is a decentralized blockchain infrastructure provider that operates an array of nodes globally distributed across over 50 Proof-of-Stake networks. This infrastructure helps drive the growth of the crypto economy while powering a full suite of multi-chain tools for Web3 users. QORPO is utilizing ANKR service for data aggregation.

At QORPO Game Studio, we are committed to pushing the boundaries of gaming innovation. One of our key pillars for achieving this is the integration of cutting-edge Artificial Intelligence technology into our game development processes. We recognize that AI has immense potential in revolutionizing the gaming industry, and we are dedicated to harnessing this potential to create unforgettable gaming experiences.

Smart NPCs vs AI Agent – What to Expect?

AI is revolutionizing the gaming industry by creating more immersive experiences through smart NPCs and dynamic conversations. At the same time, AI Agents the learn, adapt and automate players' gameplay handwriting are starting enticing gamers and developers alike. Let's dive into how this technology is enhancing storytelling and gameplay.

Smart NPCs (Non-Player Characters) powered by AI can now understand and react to player actions in nuanced ways. This means NPCs can remember past interactions, making each player's game experience unique and deeply personal.

AI-driven conversations in games are moving beyond pre-scripted responses. Through natural language processing, NPCs can engage in fluid, realistic dialogues, adapting their tone and responses based on the game's context and player's choices.

Emotionally intelligent NPCs are on the horizon. Imagine characters that can detect and respond to the player's emotional state, whether through voice tone or chosen actions, creating a truly empathetic gaming experience.

AI is also facilitating collaborative storytelling, where the game narrative can evolve based on collective player choices. This dynamic storytelling approach ensures that every playthrough has its own legacy. However, AI Agent brings possibilities we find even more enticing. We decided to pursue a way of AI integration that employs deep machine learning to understand the play-styles of gamers and based on predictive models mimic the players' gameplay and reach optimized results.

In practice, no matter if you work, sleep, or spending time with your friends and family, you can turn your AI Agent on and let the AI do the job while you enjoy the balanced results adjusted to your play-style. The future of gaming looks promising with AI. As technology advances, we can expect even more innovative uses of AI to create immersive, interactive, and emotionally engaging gaming experiences. The possibilities are endless.

Talent Trees AI Assistance

AI is revolutionizing how we approach character talent tree progression. Let's explore how AI is changing the game. AI can map out the most efficient paths through the talent tree based on your character's unique abilities and your gameplay style. This personalized guidance ensures that every choice unlocks maximum potential.

Through deep learning, AI analyzes thousands of successful talent tree progressions to recommend strategies that align with your character's strengths. This data-driven approach takes the guesswork out of decision-making. Adaptive learning is key. As your character progresses, AI adjusts its recommendations in real-time, ensuring that your progression strategy evolves with every battle and every victory, keeping you always one step ahead.

AI doesn't just focus on strength; it also identifies synergies between talents, suggesting combinations that unlock powerful combos and unique abilities, enhancing your character's versatility in battles. Predictive modeling by AI can forecast future challenges and opponents, guiding you to invest in talents that will be most beneficial against upcoming adversaries, ensuring you're always prepared for what lies ahead.

AI also encourages experimentation by simulating the outcomes of unconventional talent choices, revealing hidden gems within the talent tree that could be game-changers, encouraging creativity and innovation in progression.

The potential of AI in guiding talent tree progression in AneeMate is just beginning to be tapped. As AI technology advances, we'll see even more sophisticated and personalized progression strategies, making the gaming experience truly unique. Make sure to dare in and explore the mesmerizing realm of Hidden Islands on your own, backed by AI, followed by AneeMates.

AI-Generated 3D Modelling & Pipelines

The integration of generative AI into 3D design is reshaping how 3D scenes are crafted, animated, and utilized across diverse industries worldwide. AI's rapid data analysis and generation capabilities empower the creation of intricate 3D models with lifelike textures and materials, ushering in a realm of new possibilities.

Industries spanning entertainment, healthcare, and gaming are embracing generative AI within their 3D workflows, each with distinct objectives in mind.

For instance, in the realm of entertainment and filmmaking, photorealistic virtual characters capable of engaging in real-time conversations can be brought to life. In architecture, 3D models of structures can be derived from photographs to inform design processes. Meanwhile, in retail, images of products like shoes can seamlessly transition into immersive 3D models, enhancing virtual shopping experiences.

AI's potential to enhance 3D modeling accuracy and efficiency presents unprecedented opportunities for tailored 3D pipelines across various sectors.

AI Developer Tools

Github Copilot is an AI pair programmer that offers auto-complete style suggestions as programmers code. It helps them to write their code faster with less work. The term "AI pair programmer" implies that it can't work without the programmers.
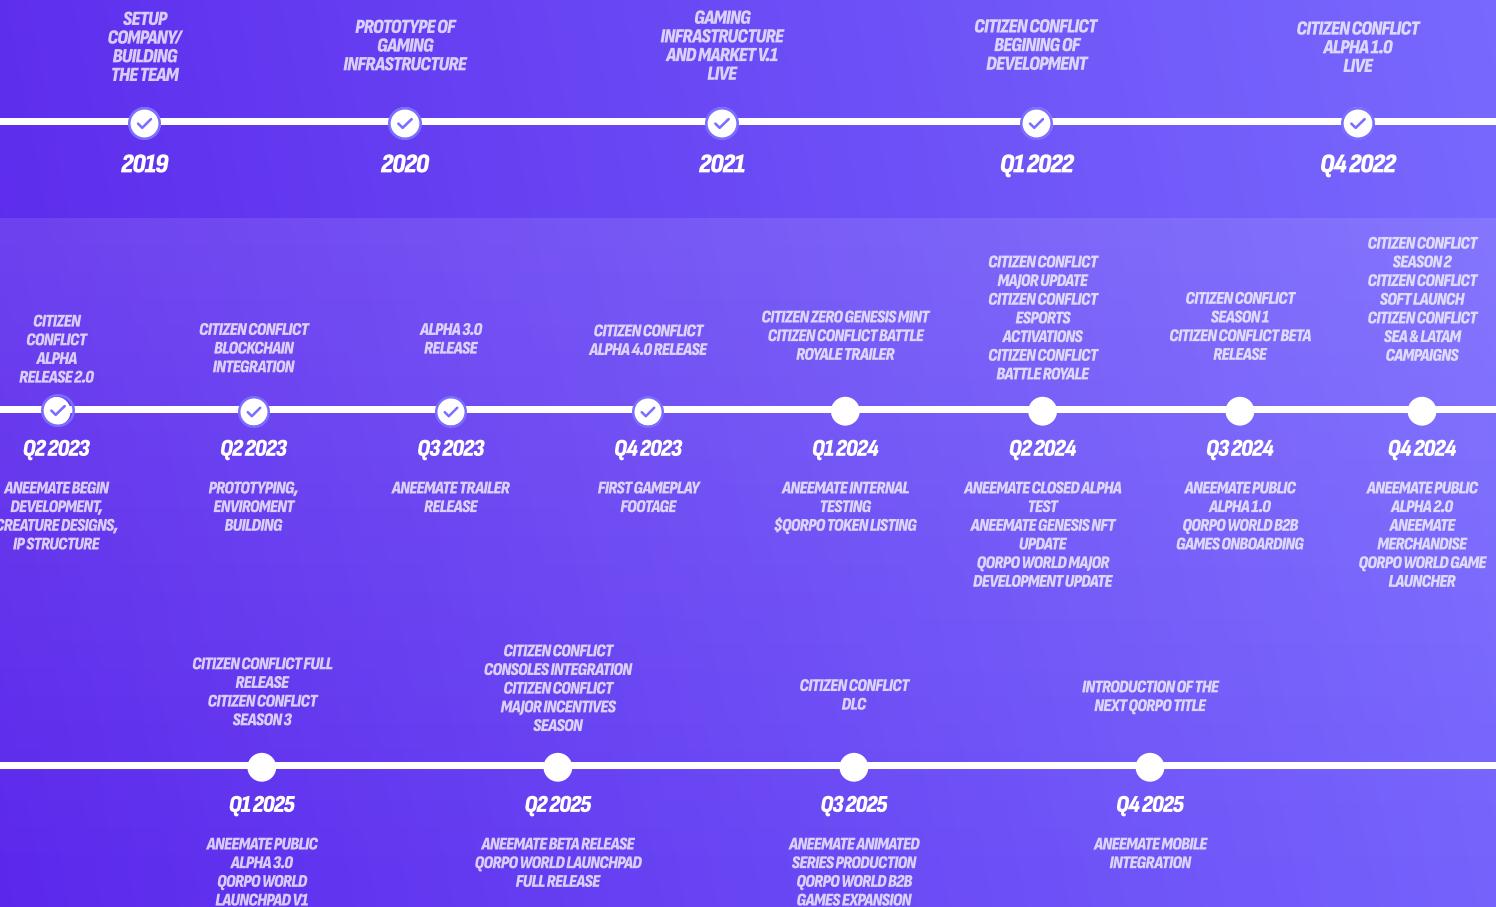

In the realm of software development, there are various ways AI can assist programmers throughout their workflow. This includes providing inline code suggestions as developers write and iterate on their code, ensuring smoother and more efficient coding processes.

Additionally, AI-powered chat interfaces can be utilized to start conversations aimed at generating or refactoring source code, producing documentation comments, or even generating unit tests.

Moreover, AI can play a crucial role in debugging by helping to identify and fix errors in code, or resolving issues encountered while running commands in the terminal. This not only saves time but also enhances the overall quality and reliability of the software being developed.

Furthermore, AI can act as a valuable resource for programmers looking to ramp up on a new codebase or accelerate their learning of a new programming language or framework. By offering guidance and answering questions, AI can facilitate the learning process and enable developers to become proficient more quickly. Ultimately, these AI-powered tools and capabilities contribute to more efficient, productive, and innovative software development practises.

GAMING PARTNERS

CORE TEAM

RASTISLAV BAKALA
CEO & FOUNDER

Rastislav Bakala is an entrepreneur and a visionary. Boasting 10 years of experience in banking and brokerage. Driven by his passion for gaming, he is now a founder and CEO of a single blockchain game development studio in Slovakia – QORPO. Being a member of the Blockchain Game Association, Fintech, and Slovak Game Association, he is at the forefront of creatives driving the industry. He doesn't believe in perfection, as there is always room for improvement.

PAVOL STRIEBORNY
CFO & CO-FOUNDER

Pavol Strieborny gained his skills with long term investing activities as well as being at various manager positions in the banking sector for several years. He gained important knowledge about working efficiently with finances throughout his professional career. One thing is for sure nothing is priced good enough for Pavol so he always finds the way to get the best deal on the market. Strategic finance planning a few years ahead with every detail and possible outcome implemented in mathematics is the way he likes his department to work.

SEBASTIAN SOOS
CBO

Sebastián Šooš is an entrepreneur and market analyst with 6 years of experience in the cryptocurrency market. During those years, he took a business part in the development of several cryptocurrency projects, which led him to the largest regional community he founded. Experience and activity within the industry brought him to the blockchain game development studio – QORPO, where he works as a CBO. Sebastián believes that with hard work, you can overcome any obstacles and achieve any goal.

MARIAN JURIK
HEAD OF ANIMATION

Marian Jurík is an professional animator with more than 10 years of experience. Marian works as head of animations with a previous experience in games such as Mafia 2, Horizon: Zero Dawn, Tarzan, or Netflix series The Websters.

CORE TEAM

MICHAL HORNAK
HEAD OF CHARACTER ARTISTS

Michal Hornák is a head of character artists in QORPO with experience from past successful projects such as Mafia 3, DayZ or ARMA.

NG BOON WEI
LEAD TECHNICAL ARTIST

NG Boon Wei joined the QORPO Game Studio as one of the first members. He has been working on several AAA titles in the past 8 years. Some of his highlighted experience is : Hogward Legacy, Diablo II Resurrected or League of Legends World Championships in 2017.

ANDREJ ONDREJOVIC
PRODUCT OWNER/ DEVOPS

Andrej Ondrejovic is an IT operational manager powered by 15 years of experience. Andrej was working on complex systems created and supported by international corporations where he gained a lot of skills in the wide area of the IT environment. Highlighted experience: DXC Technologies & Helwett Packard.

He was the former Head of Public Sector Consultancy in Dubai for IBM, where he was recognized as a pioneer in enterprise blockchain, being a co-author of the first IBM blockchain for government methodology and helping define the official government blockchain strategy of Dubai.

DISCLAIMER

QORPO is working with its legal partners to comply with regulations from around the world and avoid any possible lawbreaking.

QORPO has had several consultations with authorities and commissions and can receive the required documents to achieve its goal. That is why QORPO has established a company in Dubai.

For these purposes, QORPO and all mechanisms have to be clearly specified, proved, and protected against any possible fraud, hack, or any other harmful act that could cause any kind of problems for its users or QORPO.

QORPO promises to behave transparently. Thanks to blockchain, all transactions are auditable at all times.

QORPO will hire an external audit company that will take care of all audit duties related to the object of its business.

For all traditional payment services (VISA, MasterCard, Qiwi, PayPal, WebMoney, mobile message payments, etc.) for users from the EU, QORPO will use its subsidiary in Slovakia.

QORPO will exclude all U.S.-located contributors from its funding plan.

PLEASE READ THIS DISCLAIMER SECTION CAREFULLY. THIS DOCUMENT IS CREATED SOLELY FOR INFORMATIONAL PURPOSES ABOUT THE QORPO PROJECT. NOTHING IN THIS WHITE PAPER CONSTITUTES, OR IS INTENDED TO BE CONSTRUED AS, AN OFFER TO ISSUE, ALLOT, SELL, OR OTHERWISE TRANSFER, OR AN INVITATION, ADVERTISEMENT, SOLICITATION, RECOMMENDATION, ADVICE, OR INDUCEMENT TO INVEST IN OR MAKE A COMMITMENT TO INVEST IN, ANY SECURITIES, OPTIONS, OTHER FINANCIAL INSTRUMENTS OR OTHER ASSETS, WHATSOEVER. THIS DOCUMENT IS NOT INTENDED TO GIVE AND DOES NOT CONTAIN ANY SORT OF PERSONAL, LEGAL, OR FINANCIAL ADVICE. IT IS HIGHLY RECOMMENDED TO CONSULT YOUR OWN LEGAL AND FINANCIAL EXPERTS FOR FURTHER GUIDANCE.

1. The main goal of this Whitepaper – introduce the QORPO Project and tokens to the potential token-holders and users.

2. The information set forth below cannot be exhaustive and does not imply any elements of contractual relations. Its sole purpose – provide relevant and up-to-date information about the QORPO Project and the team behind the project to the potential tokenholders in order to determine whether to conduct a more thorough analysis about the Project with the intention to purchase tokens.

3. Although this Whitepaper aims to provide the most relevant and accurate information, the information set forth in this document is only intended to provide general and preliminary information to the potential token-holders and shall not be construed as the basis of any investment decision or strategy. This document in no way constitutes professional advice.

4. Nothing in this Whitepaper can be considered or construed as forming part of the Prospectus of any kind. The information provided in this document has no relation to the securities offering in any jurisdiction. This document is not made in accordance with the laws or regulations of any jurisdiction since it carries the informational purpose only and is not, therefore, subject to the laws and regulations designed to protect investors.

5. $QORPO Token is only intended for private sale in jurisdictions where no securities regulatory regime has been imposed on tokens by authorized governmental bodies. Potential investors from the abovementioned jurisdictions may purchase $QORPO Tokens via private deal in accordance with the $QORPO Token Sale Agreement and this Whitepaper.

6. $QORPO token is not intended for sale or use in any jurisdiction where the sale or the use of digital tokens is prohibited. For persons from such jurisdictions, this White Paper is for informational purposes only. The company reserves the right to conduct a verification procedure in accordance with $QORPO AML/KYC Policy. The list of prohibited countries residents in particular are Burkina Faso, Cameroon, Democratic People's Republic of Korea (DPRK), Democratic Republic of the Congo, Haiti, Iran, Kenya, Mali, Mozambique, Myanmar, Namibia, Nigeria, Senegal, South Africa, South Sudan, Syria, Tanzania, Yemen, Palestinian Territory and Gaza Strip and other countries that are set out in the Financial Action Task Force's (FATF) lists.

Please read the $QORPO Token Sale Agreement carefully before purchasing any $QORPO tokens.

7. $QORPO token does not give and cannot be construed to give any financial, legal or other rights in any form apart from the rights expressly de ned in the Token Sale Agreement. In case of differences in the $QORPO token definition in the Whitepaper and the Token Sale Agreement, the Token Sale Agreement definition shall prevail.

8. The risk of investing in tokens is high given the unstable regulatory frameworks, market volatility and fluctuations. Thus, only investors that have a sound understanding of the way crypto industry operates and those that have read the risk warning contained in the Token Sale Agreement, the latest version of which can be accessed on request, should purchase $QORPO tokens.

9. Some of the statements in the White Paper include forward-looking statements which reflect the Company's and/or the Directors' current views with respect to financial performance, business strategy and future plans, both with respect to the sectors and industries in which the Company operates. Statements which include the words "expects", "intends", "plans", "believes", "projects", "anticipates", "will", "targets", "aims", "may", "would", "could", "continue" and similar statements are of a future or forward-looking nature. Such forward-looking statements or information include known and unknown risks and uncertainties, which can lead to the situation when the actual events or results materially differ from the statements and estimates implied or expressed in such forward-looking statements.

10. All forward-looking statements address matters that involve risks and uncertainties. Accordingly, there are or will be important factors that could cause the Company's actual results to differ materially from those indicated in these statements. These factors include but are not limited to those described in the part containing risk warnings in the Token Sale, which should be read in conjunction with the other cautionary statements that are included in the Token Sale Agreement. Any forward-looking statements in the Whitepaper respect the Company's current views with respect to future events and are subject to these and other risks, uncertainties and assumptions relating to the Company's operations, results of operations and growth strategy.

11. These forward-looking statements speak only as of the date of the latest uploaded version of the Whitepaper in English. The Company with all rights to QORPO undertakes no obligation publicly to update or review any forward-looking statement, whether as a result of new information, future developments or otherwise. All subsequent written and oral forward-looking statements attributable to the Company or individuals acting on behalf of the Company are expressly qualified in their entirety by this paragraph. Prospective token-holders should specifically consider the factors identified in the Token Sale Agreement which could cause actual results to differ before making an investment decision to purchase $QORPO Tokens.

12. This Whitepaper can be amended at any time to provide more detailed information or reject some changed circumstances. In such cases, the latest version of the document shall prevail over the older version. The Company does not undertake to notify of any changes. The latest version of the document can be accessed via our website www.qorpo.world.

13. Although we make every effort to ensure that the latest version of the Whitepaper uploaded on the website is relevant and accurate, you must not rely on the information provided in this document as an alternative to the qualified professional advice from the third party.

14. If you have any special questions about any legal, financial, taxation or other issues, you should consult an appropriately qualified professional.
